Period of supply—Within 90 days of from the date of acceptance of chassis.

The bidder desiring to take part in the bid shall log into https://etenders.kerala.gov.in and then select tender and make the payment. Bidders will be directed to the payment gateway page of the State Bank of India. There are two options—State Bank of India Net banking payment, payment through MOPS from other banks to the payment gateway of SBI.

For obtaining digital signature certificate (DSC) and necessary portal enrollment bidders can visit the website https://etenders.kerala.gov.in.

Tenders will be opened online in the presence of such tenderers or their authorized representatives who have logged in before the prescribed time of opening of technical & financial bids. If the date fixed for opening happens to be a holiday/ due to internet failure, the tender will be opened in the next working day, at the same time.

The tenderer, or his representative, shall be Physically present at the Fire and Rescue Services Headquarters on the date prescribed, with necessary documents and presentations on all the technical aspects of the equipment and accessories for the total understanding and verification of the technical committee.

The price of the e-tender form shall be received only through online payment SBI/SBI MOPS.

The cost should be quoted in Indian currency only.

The tender has two covers:

- Technical cover
- Financial cover

The first cover ie. the technical cover shall be uploaded with the following documents.

1. Scanned copy of Departmental Technical Specification of the product intended to supply duly signed and stamped by the bidder.

The Bidder should sign, stamp and upload the Departmental Technical Specification as such, along with the tender. Uploading the Duly signed and stamped Departmental Technical Specification will be treated as the applicant is ready to supply the product as per the Departmental Technical Specification without any deviation.

In case of any deviation from the Departmental Technical Specification, the bidder shall fill and upload specification compliance statement in the following proforma, clearly marking the details of deviation, The committee will check the admissibility of the deviation mentioned by the bidder and the tender will be admitted only if the deviation proposed by the bidder is acceptable for the Departmental Technical Committe. Deviations, if any, shall be strictly marked in the Specification Compliance Statement itself. If the applicant uploaded the Specification Compliance Statement and no marking is made in the column provided for marking deviation in the statement, it will be treated as the applicant is ready to supply the product as per the Departmental Technical Specification without any deviation.

#### Specification Compliance Statement for SCUBA VAN

SI. No.	Details of Departmental Technical Specification	Details of the product offered	Deviation from Departmental Technical Specification if any

- 2. Scanned copy of the agreement in the prescribed format in Kerala Stamp Paper worth ₹ 200.
- 3. Brochure of the product intended to supply.
- 4. Work experience certificate, O.E.M. Authorisation Letter and other relevant details (as per the requirements).
- 5. Scanned copies of the declaration by the bidder on Kerala Stamp Paper worth ₹ 200 to the effect that no Vigilance Case has been charge sheeted and pending trial at Court against him/his partener/s or any of his directors in connection with fabrication/supply of similar product made earlier to this department.
- I, ................. (Name, Address, firm), do hereby declare that no Vigilance Case have been charge sheeted and pending trial at court against me, any of my partner/s or any of my directors, in connection with fabrication/supply of similar product made earlier to Kerala Fire and Rescue Services Department/Government of Kerala and none of us or our firm is blacklisted by any Government agencies/PSUs in Kerala.

6. Paid receipt of the GST of Tender Fee. (GST shall be paid by the bidder through payment methods in reverse charge basis)

#### Pre bid meeting

A pre bid meeting will be held on the date and time as mentioned above. Bidders can participate in the pre bid meeting and clarify their doubts, if any. They can clarify their doubts by sending an e-Mail to hq.frs @ kerala.gov.in and by contacting The Director (Technical), Fire and Rescue Services, Thiruvananthapuram in Phone Number-09497920101.

#### Tender Opening and evaluation

- (a) Soon after the opening of the tender, the tenderers are requested to come to the Fire and Rescue Services Headquarters with documents and presentations on all the technical aspects of the equipmeent and accessories for the full understanding of the Head Office Purchase Committee (Technical), on the date specified.
- (b) There will not be any further communications about the opening of the technical and financial bids separately. Soon on opening the technical bid of e-tenders the committee constituted to evaluate the technical aspects, will meet and scrutinize the technical specification of equipment submitted with the e-tender.
- (c) During evaluation, the tenders will be first evaluated for the compliance of Departmental Technical Specification. Only those tenders which comply the Departmental Technical Specifications will be considered for subsequent financial evaluation.
- (d) Those bidders who can comply with all the requirements and conditions of the tender only need to participate in the tender. Any special condition uploaded by the bidder will not be considered for evaluation.
- (e) The financial bid belonging to those dealers/suppliers who qualified in the technical bid of the equipment as required above by Kerala Fire & Rescue Services Department alone will be considered.
- (f) On finalization of technical evaluation, the second cover i.e. the financial bid of the concerned competent firm will be evaluated by the Head Office Committee (Finance) for consideration

#### The bidder should uipload the supporting documents along with the Technical cover

- (g) The originals of all the required documents like Technical specification compliance statement of the product, agreement in stamp paper worth ₹ 200, the declaration on Kerala Stamp Paper worth ₹ 200, Brouchers/Photograph of the item intended to supply, O.E.M. Authorisation Letter and other required documents shall be produced before the undersigned soon after the financial Bid opening.
- (h) After opening the financial bid, financial evaluation will be done and the details will be uploaded in the financial evaluation field of the e-tender site, only after consultaion with the DPC. The decision of the DPC shall be final on the admissibility of the tender and thereafter awarding of the contract.
- (i) The right of acceptance or rejection of e-tender or cancelling the tender without assiging any reason, at any stage of tendering, is solemnly vested with the Director General, Kerala Fire and Rescue Services or a committee appointed by him.

The rules and regulations prescribed for e-tenders by the Government of Kerala/Store Purchase Manual, Government of Kerala shall be applicable to this e-tender also. If any tenderer wants any clarification on any aspect of the tender he/she can send email to dt.frskerala.gov.in or Fax to 0471-2337422.

Details with respect to the e-tender and the details of specifications of the item to be purchased can be obtained from the e-tender. website https://etenders.kerala.gov.in.

Any legal dispute that may arise in relation to the e-tender formalities will be restricted to the jurisdiction of Thiruvananthapuram District Court.

DETAILED TECHNICAL SPECIFICATION FOR PROCUREMENT OF SCUBA VAN

#### I. GENERAL:

The SCUBA van shall be fabricated on the chasis with the specification mentioned below. The SCUBA van shall be designed to efficiently carry 5 persons including Driver, Rubber dinghy, OB Engine and other diving equipment.

The fabricated vehicle shall be strictly within the purview of the Motor Vehicle act and rules prevailing in the State of Kerala.

#### II. CHASSIS

The SCUBA van shall be fabricated on asuitable Double Cab pickup Chassis having the specifications as mentioned below. Chassis shall be supplied by the Department.

#### Details of Chassis.

Engine Capacity : Shall not be less than 1850CC Wheel Base : Shall not be less than 3000mm

G.V.W : Not less than 2500 Kg.

Pay load : Not less than 1000 Kg

Power : Not less than 75 bhp

Torque : Not less than 175 Nm

Ground Clearance : Not less than 185 mm

Turning Radius : Not more than 7000mm

Steering : Power Steering
No. of Doors : 4 Numbers

Emission Compliance : BS VI
Type of Fuel : Diesel

Fuel Tank Capacity : Minimum 45 litre
Warranty : 3 years minimum
Battery Warranty : Minimum 1 Year

#### III. BODY WORK AND STOWAGE:

The chasis shall be fabricated to accommodate the following equipments without sacrificing the warranty from the chassis manufacturer.

1. Sifficient numbers of lockers with shutter shall be provided for storage of equipments and accessories listed below in an easily accessible manner. Suitable straps, brackets, etc. shall be provided for all the items listed. (Equipments and accessories shall be provided by the Department). The roller shutter shall extend till the bottom platform for easy handling of the equipment.

	SI. No. Items	No.	Remark
1	Scuba set with carrying case	4	
2	Spare Cylinder.	6	
3	Boots, Fins and Gloves, Life Line, Under water Torch, Tool Kit, Weight Belt Diver's Weight, rope, Anchor & Weight 10 to 20 Kg	4 each	Roll in roll out tray to be provided
5	Half Face Mask, face mask, Diving Knife, Spare Air,	4 set each	Roll in roll out tray to be provided.
6	Facility to hang the wet BCD and diving suit.	4	
7	Out board engine, its trolly and petrol tank.	l each	Roll in roll out tray for OB Engine
8	Lifebuoy & life Jacket	3 Each	
9	Rubber Dinghy	1	Provision on top of the Vehicle.

- 2. The design shall be such that the Out Board Engine shall be placed vertically to prevent oil leakage.
- 3. The rear body structure/frame work shall be of welded constructions and made from atleast 2mm thick MS square tubes. The Angles and channels used shall be of min. 3mm thickness. The complete structure material shall be treated for anti corrosion by Zinc plating. The plating thickness shall not be less than 20 microns. Two coats of Epoxy paint shall be applied to the completely welded structure. The structure shall be so designed as to avoid any vibration/rattling/deformation in the intended usage of the vehicle. The interior panelling shall be done from 1.22mm thick aluminium sheets and the exterior panelling shall be done from 1.60mm thick aluminium sheets.
- 4. The roller shutters shall be made from extruded aluminium sections with suitable roller, spring, guide channels, etc. All aluminium sections used shall be properly anodized. The roller shutters shall be rolled inwards underneath the roof giving unobstructed access to the equipment lockers. These roller shutters shall open in every position of the vehicle even in rough terrain. Guide rails shall support the shutters over entire length on both sides to make them absolutely torsion free. The roller shutters shall have a sturdy lock, and shall prevent accidental opening during movement of vehicle. Roller shutters shall be made of hollow rectangular shaped aluminium links which shall be inter connected with rubber/plastic/PVC profiles sealing the roller shutter watertight when closed. The complete shutter assembly, the side, bottom and main profiles as well as the locking system shall be from the shutter manufacturer only. These roller shutters shall be durable, maintenance free, weather and corrosion resistant. The roller shutter shall extend till the bottom platform for easy handling of the equipment.

Preferable make (Shutters): Ziegler, MCD, Rosenbauer Firescape or equivalent.

5. One load carrier to carry one Rubber dinghy with an approximate weight of 150 kg and with exterior size not less than 4200mm x 1800mm, should be fitted on the roof top of the vehicle. The carrier should be strong enough to carry the load and withstand the air resistance while the vehicle is on move with Rubber Dinghy on the top. Necessary rollers for easy loading and unloading of the Rubber Dinghy to be provided in the carrier. Minimum two numbers of Ratchet belt system to hold the dinghy tight to be integrated with the carrier.

#### IV. ELECTRICAL SYSTEM:

All important electrical circuits shall have separate fuses suitably indicated and shall be grouped into a common fuse box located in an accessible position. The wiring should be single pole and should not be exposed to the atmosphere. Conduits is should be used wherever necessary. All equipments lockers should have individual lights which will automatically switch on when the locker door is opened (which will be fully LED based) and these should be operated by means of a master switch on the dash board in the driver's cabin. The switch of the light/siren should be provided on the dash board. Vehicle on yellow background in black letters.

#### OTHER ELECTRICALS

Two fog lamps in addition to normal head lights shall be installed. Blinker type traffic indicators provided by the OEM shall be maintained in the vehicle after fabrication. Reversing lights on either side should be fixed suitably at the rear of the appliance.

A spotlight not less than 30 W (LED) power shall be provided on the appliance.

Two-tone hooter cum P.A. System having 25 watt capacity with speaker, LED Light bar with red, blue and white flasher lights of minimum 75-100 watts and not less than 1000mm size shall be mounted on the cabin roof with amplifier in the cabin. One pair of additional Mega sonic High Tone electric horn shall be provided. Reverse gear buzzer and indicator buzzers shall be provided.

2 Nos. Duel Red- White and 2 Nos. Duel Blue-White Scene-Lighting LED Blinkers with inbuilt flasher should be installed on the upper periphery of the super structure. The Blinkers should have an option of minimum 12 Watt spot lighting with Low, light visibility. All LED used for Blinkers shall be minimum 3 Watts. The base shall be of Aluminium and the cover shall be Polycarbonate. The light shall be compatible to 12V. It should be SAE certified from NABL/Accredited Lab. Authority letter of the manufacturer regarding confirmation of the specifiation should be submitted along with the bid.

#### V. REAR VIEW CAMERA.

Rear view camera shall be provided for the vehicle with 7 inch LCD screen within the cabin.

#### VI. WORKMANSHIP AND MATERIAL

Workmanship executed shall be of the highest order. All rivets and bolt holes shall have a coat of approved paint on both surfaces before riveting or bolting or welding. All steel screws, bolts, nuts, rivets etc. shall be zinc coated or shall have rust proof coats by a recognized process.

The roof joints shall be subjected to rigid water test a vendor's workshop in presence of purchaser's representatives. All directions and instructions on all points related to the fabrication shall be executed whenever given by the purchaser's representative for quality and workmanship. All the material used the fabrication of the body work shall be of good quality or approved make and type.

#### VII. PAINTING

- 1. The appliance's body shall be painted fire red in colour conforming to Shade No. 536 of IS 5: 1978. The paint shall conform to IS 2932 (If the cab chassis has already been painted red in colour by the chassis manufacturer it is not necessary to paint again over that paint coat, however the final decision on painting will be done in consultation with KFRS Department).
- 2. The words "KERALA FIRE & RESCUE SERVICES" shall be painted in letters of 10 cm height on one side of the body and on the front of the vehicle in golden yellow colour paint. Same text in "Malayalam Font" shall be painted on the other side and rear in same manner.
- 3. The name of the department "KERALA FIRE & RESCUE SERVICES" in form of sticker in fluorescent red letter in yellow background shall be affixed on the top of the front wind screen glass.
- 4. Emblem of the department shall be affixed on either side of the cabin front Door (Model shall be provided by the department).
- 5. The words, 'Dial 101' shall be written on all the four sides of the vehicle on yellow background in black letters.

#### VIII. SPECIFICATIONS AND DRAWINGS

Considering the detailed Specifications, drawings (both the Hard copy as well as Soft Copy shall be included) shall be prepared and submitted by the Vendor. The Director General, Kerala Fire & Rescue Services or his representative may suggest modifications to the drawings. However, modified drawing should be submitted by the Vendor within 3 days from the suggestion/discusson. The Bidder shall start the work only after getting the drawings approved by the Director General Kerala Fire & Rescue Services; The drawings should clearly illustrate all the details. Two sets of complete and final Drawings (both the Hard copy as well as Soft Copy shall be included), in respect of fabrication, Stowage arrangements, fittings, electric circuit arrangement etc. shall be supplied along with each appliance at the time of delivery. The quote shall be inclusive of the charges for such drawing also.

One Prototype of the SCUBA van, as per the Departmental Technical Specification, shall be fabricated and got approved by the Director General, Kerala Fire and Rescue Services, before commencing fabrication of the entire lot of SCUBA Van.

#### IX.WORKMANSHIP AND FINISH:

- 1. A high quality workmanship and the finish is expected during the Fabrication and the time of delivery of the unit.
- 2. All the sharp edges shall be grinded properly.
- 3. All the joints shall be even and accurate.
- 4. All the welding shall be perfect without air blows.

#### X. ACCEPTANCE

Vendor shall ensure that design of SCUBA VAN will not affect chassis parameters such as speed, turning circle, acceleration, GVW etc. The fully fabricated vehicle shall be delivered at Fire and Rescue services Head quarters, Thiruvananthapuram Free on road. The delivered vehicle will be inspected by a board of officers for the general functioning of vehicle and road test. The vehicle shall be accepted by the department based on this report.

#### Conditions

1. Essential documents to be submitted along with the Tender

Pamphlets, Photograph, Drawings, CD etc.

2. Period of delivery

Within 90 days from the date of acceptance of

chasis.

3. F.O.R.

: Thiruvananthapuram.

4. Payment

100% Payment against delivery of Scuba Van at Thiruvananthapuram and acceptance by an

acceptance committee

5. Warranty

A Warranty of 24 months for the fabrication and for the accessories as per specification

from the date of final acceptance.

#### 6. Other Special Conditions:

- (1) EMD-1% of PAC in online payment.
- (2) Security Deposit 5 % of total contract amount to be furnished as mentioned in the Notice inviting e-Tender, which will be released after the expiry of the warantee period.
- (3) Any firm whose proprietor, Partner or Director is involved in a Vigilance Case has been charge sheeted and pending trial at court in connection with fabrication/ supply of similar product made earlier to this Department Kerala Government are not eligible to participate and shall be barred from participating in this tender.
- (4) The tenderers should produce latest solvency certificate of ₹ 3 Crores or more and should have an average annual turnover of ₹ 2 Crores for the last 3 Years.
- (5) Anybody attempting to offer bribe or otherwise influence in any manner the officials of the Kerala Fire and Rescue Services or its supervisory levels in the Government will be disqualified.
- (6) The bidder should have sufficient previous experience (Minimum 3 Years) in fabricating Fire fighting vehicles, (at least 15 Fire Fighting Vehicles should have been fabricated by the bidder during last three years). The copies of supply order for fabricating Fire Fighting Vehicles placed by States, Union Territories, and Public Sector Undertakings for previous years should be produced in support.
- (7) On receipt of the chassis, the tenderer should provide Insurance cover for the Kerala Govt. Property for an amount equal to the cost of total number of chasis for fire damages due to other natural or man made calamities and theft.
- (8) Renewal of temporary registration processes shall be performed by the fabricator at their own expense. A valid Temporary Registration Certificate (T.P) shall be produced before the department at the time of delivery.

- (9) The detailed drawing for fabrication shall be submitted and got approved from the department by the fabricator before commencing the fabrication.
- (10) If the supplier is not in a position to repair the equipment or accessories provide in the vehicle, they shall arrange for total replacement of that particular item, as the case may be up to a period of 3 years from the date of acceptance of the vehicle by the department at Thiruvananthapuram.
- (11) The vendor shall be responsible for the maintenance of the Scuba Van for any defects or damages to vehicle due to bad workmanship or of any inferrior material, accessories, apparatuses etc.
- (12) The chassis shall be collected by the vendor from the chassis supplier location. Final Registration of the vehicle will be arranged by KFRS after the completed vehicle is delivered to the KFRS. The vendor shall take temporary registration of completed vehicle and submit all relevant documents to the KFRS for final registration.
- (13) Any damage/short fall shall be made corrected by the vendor at no extra cost to KFRS. After receiving chassis from the KFRS, and during the period of fabrication of Scuba Van, vendor shall arrange to carry out all periodic services as recommended by the chassis Manufacturer at its fabrication site.
- (14) After accepting the chassis by the fabricator and till such time the completed vehicle is delivered to the KFRS, it shall be the vendor's responsibility to protect the chassis from damage, accident, pilferage etc.
- (15) Any modification like Welding, drilling etc. on framework of chassis should be done as per the guidelines given by the chassis manufacturer. The Vendor should submit load distribution chart on axles before starting the fabrication. All axles should be loaded within the maximum permissible pay load specified by the chassis manufacturer.
- (16) Any restriction on performance of chassis, observed during/after execution of order shall have to be rectified by vendor in consultation with KFRS and chassis manufacturer. Such corrections shall be at no extra cost to KFRS. The vendor shall be responsible for supplying all equipment/accessories and properly fixing them on the chassis as described in the specification. Other details and requirements which are not covered under the specification, but may be necessary to complete the SCUBA Van and/or to fulfil the operation/performance requirement shall be provided by the vendor, who shall be responsible for the designing, engineering and construction of the complete appliance to the full satisfaction of the KFRS. Before finalizing of design, the same needs to be approved by KFRS.
- (17) At the end of complete fabrication of SCUBA Van, the Vehicle with fully laden conditions shall be checked and certified by vendor for correct load distribution on individual axle. The actual individual load on axle shall not exceed the allowable limit specified by chassis manufacturer or regulating authority, whichever is lower. Chassis supplier shall be called at the vendor's site to verify the correct load distribution & fabrication of vehicle as per guidelines of chassis supplier.

Office of the Director General, Fire and Rescue Services, Thiruvananthapuram-1.

Sandhya, B. I.P.S., *Director General*.

#### e-TENDER NOTICE

(2)

No. FIREHQ/8088/2021-M1.

23rd October 2021.

e-Tenders in two cover system are invited from competent manufacturers or their authorised dealers with adequate stock and spares and repair capabilities for the Fabrication and supply of 25 Nos. of Fire Tenders as per the specifications of this department. The tender is to be submitted as e-tenders through https://etenders.kerala.gov.in. Since this is an e-tender, only those bidders who have enrolled in the above portal with their own Digital Signature Certificate (DSC) can participate in the tender.

e-Tender document and other details can be obtained from the above e-portal.

The tender has two parts:

- 1. Technical bid.
- 2. Financial bid (BOQ).

Tender No. with PAC—KFRS-E-Tender No. 02/2021-22/SN—₹ 800 Lakhs.

Closing date of e-tender—20-11-2021, 4 p. m.

Date and time of pre bid meeting—5-11-2021, 2 p. m.

Last date and time of receipt of e-tender—20-11-2021, 4 p. m.

Date and time of Sample/Documents/Presentations Verification—25-11-2021, 2.30 p.m.

Date & time of opening of e-Tender:

- 1. Technical bid—25-11-2021, 11 a.m.
- 2. Financial bid—25-11-2021, 4 p. m.

Cost of e-Tender (online submission)—₹ 25,000+ GST @ 18% (GST shall be paid by the bidder through GST payment methods in reverse charge basis.)

Date upto which the rates are to remain firm for acceptance—31-3-2023.

EMD—1% of PAC in online payment.

Security Deposit—5% of total contract amount. (To be furnished as bank guarantee of a Nationalised or Scheduled Commercial Bank.)

Period of supply—Within 90 days from the date of acceptance of chassis.

The bidder desiring to take part in the bid shall log into https://etenders.kerala.gov.in and then select tender and make the payment. Bidders will be directed to the payment gateway page of the State Bank of India. There are two options—State Bank of India Net Banking payment, payment through MOPS from other banks to the payment gateway of SBI.

For obtaining Digital Signature Certificate (DSC) and necessary portal enrolment bidders can visit the website https://etenders.kerala.gov.in.

Tenders will be opened online in the presence of such tenderers or their authorized representatives who have logged in before the prescribed time of opening of technical & financial bids. If the date fixed for opening happens to be a holiday/due to internet failure, the tenders will be opened in the next working day, at the same time.

The tenderer, or his representative, shall be physically present at the Fire and Rescue Services Headquarters on the date prescribed, with the necessary documents and presentations on all the technical aspects of the equipment and accessories for the total understanding and verification of the technical committee.

The price of the e-tender form shall be received only through online payment SBI/SBI MOPS.

The cost should be quoted in Indian Currency only.

The tender has two covers:

- Technical cover
- Financial cover

The first cover i.e: the technical cover shall be uploaded with the following documents:

1. Scanned copy of Departmental Technical specification of the product intended to supply duly signed and stamped by the bidder.

The Bidder should sign, stamp and upload the Departmental Technical Specification as such, along with the tender. Uploading the duly signed and stamped Departmental Technical Specification will be treated as the applicant is ready to supply the product as per the Departmental Technical Specification without any deviation.

In case of any deviation from the Departmental Technical Specification, the bidder shall fill and upload specification compliance statement in the following proforma, clearly marking the details of deviation. The committee will check the admissibility of the deviation mentioned by the bidder and the tender will be admitted only if the deviation proposed by the bidder is acceptable for the Departmental Technical Committee. Deviations, if any, shall be strictly marked in the Specification Compliance Statement itself. If the applicant uploaded the Specification Compliance Statement and no marking is made in the column provided for marking deviation in the statement, it will be treated as the applicant is ready to supply the product as per the Departmental Technical Specification without any deviation.

#### Specification Compliance Statement for Fire Tender

SI. No.	Detail of Departmental Technical Specification	Detail of the product offered	Deviation from Departmental Technical Specification, if any

- 2. Scanned copy of the agreement in the prescribed format in Kerala Stamp Paper worth ₹ 200.
- 3. Brochure of the product intended to supply.
- 4. Work Experience Certificate, OEM Authorisation Letter and other relevant details. (as per the requirements)
- 5. Scanned copies of the declaration by the bidder on Kerala Stamp Paper worth ₹ 200 to the effect that no Vigilance Case has been charge sheeted and pending trial at Court against him/his partner/s or any of his directors in connection with fabrication/supply of similar product made earlier to this Department.

6. Paid Receipt of the GST of Tender Fee. (GST shall be paid by the bidder through GST payment methods in reverse charge basis)

#### Pre bid meeting

A pre bid meeting will be held at Fire and Rescue Services Headquarters, Thiruvananthapuram on the date and time as mentioned above. Bidders can participate in the pre bid meeting and clarify their doubts, if any. They can clarify their doubts by sending an e-Mail to hq.frs@kerala.gov.in and by contacting The Director (Technical), Fire and Rescue Services Hqrs, Thiruvananthapuram in phone number 0949792010 1.

#### Tender opening and evaluation

- (a) Soon after the opening of the tender, the tenderers are requested to come to the Fire and Rescue Services Headquarters with documents and presentations on all the technical aspects of the equipment and accessories for the full understanding of the Head Office Purchase Committee (Technical), on the date specified.
- (b) There will not be any further communications about the opening of the technical and financial bids separately. Soon on opening the technical bid of e-tenders, the committee constituted to evaluate the technical aspects, will meet and scrutinize the technical specification of equipment submitted with the e-tender.
- (c) During evaluation, the tenders will be first evaluated for the compliance of Departmental Technical Specification. Only those tenders which comply the Departmental Technical Specifications will be considered for subsequent financial evaluation.
- (d) Those bidders who can comply with all the requirments and conditions of the tender only need to participate in the tender. Any special condition uploaded by the bidder will not be considered for evaluation.
- (e) The financial bid belonging to those dealers/suppliers who qualified in the technical bid of the equipment as required above by Kerala Fire & Rescue Services Department alone will be considered.
- (f) On finalization of technical evaluation, the second cover i.e., the financial bid of the concerned competent firm will be evaluated by the Head Office Committee (Finance) for consideration.

The bidder should upload the supporting documents along with the Technical cover.

- (g) The originals of all the required documents like Technical specification compliance statement of the product, agreement in Stamp Paper worth ₹ 200 the declaration on Kerala Stamp Paper worth ₹ 200 and Brouchers/Photograph of the item intended to supply, OEM Authorisation Letter and other documents shall be produced before the undersigned soon after the Financial Bid opening.
- (h) After opening the financial bid, financial evaluation will be done and the details will be uploaded in the financial evaluation field of the e-tender site, only after consultation with the DPC. The decision of the DPC shall be final on the admissibility of the tender and thereafter awarding of the contract.
- (i) The right of acceptance or rejection of e-tender or cancelling the tender without assigning any reason, at any stage of tendering, is solemnly vested with the Director General, Kerala Fire and Rescue Services or a committee appointed by him.

The rules and regulations prescribed for e-tenders by the Government of Kerala/Store Purchase Manual, Government of Kerala shall be applicable to this e-tender also. If any tenderer wants any clarification on any aspect of the tender, he/she can send email to dt.frs@kerala.gov.in or fax to 0471-2337422.

Details with respect to the e-tender and the details of specifications of the item to be purchase can be obtained from the e-tender website https://etenders.kerala.gov.in.

Any legal dispute that may arise in relation to the e-tender formalities will be restricted to the jurisdiction of Thiruvananthapuram District Court.

Specification for the Fabrication of Fire Tender with Fire Fighting Equipments And Accessories

#### 1. General

The Fire Tender shall be fabricated on the chassis (Cowl chassis) mentioned below. The Fire Tender shall be designed to efficiently carry 5000 litres of Water. A centrifugal fire pump with a discharge capacity not less than 3000 LPM at 7 kg/cm² and 300 LPM at 35 Kg/cm² driven through heavy duty Power Take Off (PTO) unit shall be provided in the vehicle.

#### 2. Chassis

Chassis shall be supplied by the Department with the following specifications.

Wheel Base: Not more than 5000mm

G.V.W: Not less than 18,500Kg.

Turning Circle Diameter: Not more than 20m Road Clearance: Not less than 220mm

Overall width: Not more than 2500mm

Power: Not less than 180 bhp Emission Compliance: BSVI

Steering : Power Assisted Steering

Braking: System with ABS

Fuel: Diesel

The fabricated vehicle should meet all the regulation with respect to motor vehicle Act/Rules in force in the State of Kerala and in no case the weight of the fully fabricated vehicle exceed the rated GVW of the chassis, in fully loaded condition with water, all equipments and crew.

#### 3. Material

The material to be used in the construction of the appliance shall be made with a view to combining Lightness with Strength and Durability. All metal parts exposed to atmosphere shall either be of corrosion-resisting material or treated to resist corrosion.

#### 4. Fire Pump (Multi-Pressure Type)

The fire pump shall be:

- CE Marked (as per EN: 1028:2002 ) and U/L certified.
- The pump shall multi pressure centrifugal type and shall be rear mounted.

#### 4.1 Pump Construction

High pressure-low pressure type fire pump shall be of Gun Metal construction and shall be mounted at the rear of the vehicle driven by vehicle engine through a power take off of suitable

ratio to ensure maximum hydraulic efficiency of the pump. The pump shall be compact and of modular design having one 140 mm suction with round threads as per IS 902 with a removable strainer and four 63mm deliveries as per IS 901 with instantaneous delivery coupling. The discharge manifold shall have inbuilt provision for tank filling piping. The entire high pressure suction of the pump shall be made of stainless steel (SS 304/CF8). The pump shall be of front access design such that maintenance of important components like low pressure impeller, high pressure impeller, mechanical seal etc. can be carried out on vehicle without removing the pump and pump's discharge side piping. The low/normal pressure centrifugal impeller shall be made up of gun metal and shall be dynamically balanced. The high pressure impeller of regenerative type shall be made up of stainless steel and a reliable high pressure filter shall be provide for filtering the water before entering into the high pressure impeller. Both the low and high pressure impellers shall be mounted on a single stainless steel shaft. The pump shall have a self-adjusting mechanical carbon seal. The pump shall be capable of both high and low pressure operations and operation of high pressure shall be controlled by an easily accessible single changeover lever. Outlet for high pressure of not less than 25mm diameter size shall be there. The pump shall have an inbuilt pressure relief valve to control the high pressure within specified limits and a suitably sized thermal relief valve shall also be provided to control water temperature within the pump below the specified limit. The pump housing shall have the provision to connect cooling water line. The pump shall be able to perform the following duties.

- (a) Low/Normal pressure-Not less than 3000 LPM @ 7 bar when tested at a suction lift of 3.0 mtrs at NTP conditions.
- (b) High pressure 300 LPM @ 35 bar.
- (c) Deep-lift test from 7 meter.

The pump shall be accompanied with following original test reports

- 1. Hydrostatic test
- 2. Pump material test
- 3. Performance test

Preferable Make: Fire-Fly (MFV - MP 1030) or equivalent Models from ROSENBAUER/GODIVA.

Warranty for pump: Not less than 3 year (Certificate of warranty shall be provide during supply for each pump).

#### 4.2 Priming System

A Heavy-Duty Fully-Automatic Reciprocating Priming System shall be fitted to the fire pump. The priming system shall be fully-automatic in action. It shall not require any manual operation from the part of the pump operator other than throttling the engine, once the pressure is achieved in the pump. Primer activation and deactivation shall be directly controlled by pump pressure. The priming system shall be twin piston reciprocating type and shall be capable of priming from a depth of 3 metres within 12 to 20 seconds. The primer shall be capable of lifting water at least 7.0 metre in not more than 36 seconds when connected with 140 mm suction hose. Arrangement shall be made to actuate the primer in Manual mode also. When operating in Manual mode primer should be engaged simply by pressing a single Button/lever when it is needed. When operating in Auto mode, primer must be internally actuated and must automatically re-engage when pressure is lost. Priming system driven by any external belts/chain is not acceptable. The primer shall be preferably designed with a view to prime when the pump is running at speed of 1000 to 1500 rpm.

*Note:* Details of pump such as its make and model with full technical features, supported with catalogues, brochures, drawing etc. shall be attached with the offer. The drawing showing the pump performance curve shall be enclosed.

#### 5. Electronic Pump Control Panel

Electronic Pump Control Panel, CE Certified, shall be provided and the control Panel should be integrated with vehicle's CAN-Bus network. The Control Panel should embed with an LED backlit 7 inch display with key inputs, which should indicate and control the following in real-time.

- (a) Low, High and Compound Pressure Indication.
- (b) Engine Coolant Temperature and Engine Oil Pressure Indication.
- (c) Engine and Pump RPM Indication.
- (d) Pump Running hours.
- (e) Control Panel should have Key Inputs with Red and Green illuminated LED switches for Increment and Decrement of Vehicle Throttle to operate the Pump at its rated capacity. Further these switches shall be activated by a master switch to prevent accidental operation. Master switch shall be provided near the control panel andinside the cabin.
- (f) Vehicle RPM should automatically go to IDLE when water level falls below 2%.
- (g) Separate blue illuminated switch for direct IDLE RPM from any Engine RPM.
- (h) Bar Type Display.
- (i) Real time Tank Volume Indication in Liters.
- (j) Operating System should be in English Language (If multi lingual, Malayalam shall also be provided)
- (k) The Control Panel should be provided with regulated power supply free from Battery voltage fluctuations.
- (l) All Connectors should be IP67 or higher rated and the front bezel of Control Panel should be IP65 or higher rated.

The details of the Electronic Control Panel such as its make and model, Supported with authority letter from manufacturers/catalogues/brochures/drawings etc. should be attached with the offer.

#### 6. Cooling System

Indirect cooling system of open circuit type consisting of special heat exchanger shall be provided to the vehicle to enable full power output to be maintained during pumping duty without overheating.

#### 7. Power Take Off (P.T.O) Unit

Pump shall be coupled to the prime mover of the chassis through a P.T.O. The PTO will be of heavy-duty capable of transmitting the full power of engine to the pump. The PTO unit will match the engine and pump characteristics and shall have a step up gear ratio of not less than 1:1.27. A separate lever in the driver cabin will engage PTO. PTO Engagement mechanism shall be pneumatic based, with a stand-by mechanical over-ride lever provision. Necessary support for PTO units, propeller shaft couplings, universal joints etc. shall be provided. There shall be locking, device on manual PTO lever to prevent accidental engagement/disengagement. The drive assembly component (shaft, couplings) will be dynamically balanced. A cooling coil made of copper pipe shall be provided in the bottom of the P.T.O casing. PTO shall have the following features:

- Automatic air-controlled self-locking gear shift mechanism using air power to shift from road to pump mode by actuation of single lever.
- Mechanical linkage assembly for PTO—Prime mover—Pump, should be of three piece connection and should be supplied by OEM of pump/PTO and shall be acceptable to (As per the standards of) the chassis manufacturer.
- 3 Years warranty for P.T.O and connecting drives shall be provided by the fabricator.

Acceptable Make: FIRE-FLY Fire Hawk Series or equivalent model of reputed make.

#### 8. Water Tank

The water tank will be of 5000 litres capacity, fitted on the chassis so as to allow full flow of water to the pump. The mild steel plates used for the tank shall be zinc plated or galvanized and shall be given adequate anti-corrosive treatment of epoxy treatment consisting of one coat of primer with two coats of finish after preparing the surface by sand blasting from inside and outside after fabrication if it is not galvanized. All welded areas shall be smoothened by proper grinding. The design of the tank shall be such that the centre of gravity will be kept as low as possible. The water tank shall be installed on the Fire Tender and shall have the following parameters.

Capacity	5000 Litres
Material of Construction	MS
Bottom Plate Thickness	5 mm
Side Plate Thickness (Die Pressed Stiffened on Two Sides)	5 mm
Top Plate Thickness	5 mm
Baffles Thickness	5 mm
Numbers and Size of Manhole	1 x 450 mm
Numbers and Size of Cleaning Hole (Bottom of Tank)	1 x 250 mm
Drain Pipe on Cleaning Hole	50 mm
Overflow Pipe Size	100 mm
Tank Filling Line Size	80 mm
Number of Tank Filling Connections	1 x 63 mm

#### Design & Plumbing

The water tank shall be designed to carry 5000 Litres of water. The tank shall be baffled in order to avoid surge when the vehicle is braking, accelerating and cornering. The manhole shall have a hinged cover so that the manhole will also act as a filling orifice. Suitable eyes (four Nos. of folding type lifting eyes) Shall be provided on the shell of the tank to enable it to be lifted off the vehicle for repairs when required. The bottom of the hooks will be further strengthened with flange type plates mounted on the top of the tank to avoid any damage to the tank during the process of lifting off the tank.

A cleaning hole shall be provided at the bottom of the tank which will be fitted with a drain pipe and valve without reducing the effective ground clearance. The tank will be fitted with an overflow pipe taken down to a point well below the chassis that discharges the water away from the wheels. The overflow pipe shall be so designed and located to ensure that water will overflow through overflow pipe only while filling tank, but no water shall overflow through overflow pipe when appliance is in motion or negotiating up/down gradient and/or brake is applied to the moving appliance.

Provision for hydrant connection incorporating a strainer shall be provided for filling the tank. A pipeline will be taken from the tank to the suction inlet of the pump incorporating a quick action butterfly valve. The tank will be connected with the pump in such a manner that pressurization of water tank or water tank to pump connection is avoided when pumping water from an outside source of supply. The plumbing between the pump and the hose reel will have a clear unobstructed waterway of not less than 25mm throughout. The water tank with its entire fitment shall withstand hydrostatic pressure of 0.3 kg/cm<sup>2</sup>.

#### **Baffles**

The tank should be suitably baffled to prevent surge while the vehicle is accelerating, cornering and braking. The design of the baffles shall provide access to all compartments for repairs and maintenance. The baffle shall be arranged in a manner to facilitate the movement of a person throughout the tank for cleaning and welding purposes.

#### Tank Mounting System & Tank Level Indicators

Sub-frame & Mounting System:

(1) A full length runner from behind the driver cabin till end of chassis frame shall be provided. The runner shall be made out of mild steel Channel of 100 x 50 x 5 mm suitably fixed to the chassis frame with 6 mm thick mild steel plate and bolted to chassis frame wherever holes are available in the chassis frame and also with 16 mm 'U' bolts and nylock nuts. The tank shall be mounted on minimum two/three cross members to counter act the stresses caused b' chassis flexion and shall be so secured that it can be easily removed. The water tank shall be fixed to the chassis frame and runner with 'U' clamps of 16 mm diameter with aluminium packing block and self- locking nuts. The manufacturer shall provide complete design data of mountings and sub-frame including the load calculations and quantity sufficiency for approval before starting fabrication. Tank will be mounted on the chassis in a manner keeping in view the proper load distribution on the axles. Load distribution chart and detailed drawing from the competent authority shall be submitted for obtaining approval from the department, before commencing fabrication.

A water level indicator shall be provided near the control panel. The level indicator calibrated on full, 3/4, 1/2, 1/4 and empty shall be of the graduated glass tube, clear acrylic and electronic type. In case of the graduated glass tube or the clear acrylic type, means will be provided to isolate the same from the tank for maintenance as well as to extend the life of the tubes. Ultra bright LED indicators with distinct red, yellow and green indication marking shall be provided to show the different water levels. Tank with 75% water and above shall show green indication, 25% to 75% shall show yellow indication and below 25% shall show red indication. Tank level shall be measured using pressure transmitter. The LED tank level indicator should be IP 65 rated, CE approved and operative voltage 9 to 28 volts. The display should have water proof bezel and flanged design for easy mounting.

#### Primer Coating of surface for water tank

Blast cleaned surface shall be coated with primer within 4 hours of sand blasting; steel may be given primer coat before and after fabrication. In either case, primer coat to a dry film of minimum thickness of 25 microns shall be applied. Touch up with primer shall be done again to welds, burnt and cut edges, after fabrication. The water tank shall be given two coats of epoxy treatment inside and outside which shall consist of two coats of primer with two coats of epoxy finish.

#### 9. High Pressure Hose Reel With Gun

- 1. One high-pressure hose reel shall be provided and fixed at suitable location on the rear of the vehicle. This hose reels shall be connected to H.P out let of pump with reputed make ball valve of suitable size.
- 2. The design and size of hose reel shall be such that, it shall accommodate 60Mtrs. H.P. hose having 25 mm bore.
- 3. The HP hose reel shall be provided with High Pressure fog/Jet trigger type gun preferably AKRON or equivalent models of ROSENBAUER/FIRECO/FIREFLY/POK/FIREBUG.
- 4. Should be CE marked and Certificate should be produced with the tender.
- 5. Warranty: Not less than 24 months.

#### 10. Water Cum Foam Monitor

A water cum foam monitor having the following features shall be mounted on the roof top of the vehicle at a suitable location. The monitor shall be of durable, light weight construction and shall be corrosion.

Construction: Body and Tube—SS/Aluminium alloy/gun metal/Elc—O-Lite.

Nozzle: Gun metal.

Pick-up Tube : PVC Non-collapsible Hose with SS304 Dip Tube Flow rate : Not less than 1750 1pm @ 7 bar.

Discharge pattern: Jet to spray. Horizontal swivel range: 360°.

Vertical travel: Not less than 135° (-45°-+90°).

Warranty: Not less than 24 months.

Preferable make: ELKHART/AKRON/ROSENBOUR or similar reputed brand.

#### 11. Body Work And Stowage

#### **Body Fabrication**

Front wind shield glass and side glasses should be fitted as low as possible to provide the driver with clear-visibility of traffic, in the front and on the flanks.

#### Driver Cabin and Crew Cabin

- 1. The cabin compartment shall provide enclosed accommodation to six persons including a driver and officer in charge.
- 2. The driver seat shall be adjustable—forward, backward & vertically and bucket type.
- 3. Seat belt shall be provided for both driver and officer seat.
- 4. At the rear end of the driver cabin, a crew seat running along the width of cab (with back rest) shall befabricated in the form of a box with three compartment, one for the batteries, one for keeping spare BA Set cylinders with anti rolling fastener and the other for placing mechanical tool kit. The crew seat shall be enough for 4 persons.
- 5. All seats shall be cushioned with 100 mm foam and upholstered with good quality rexine.
- 6. Ply wood shall not be used as the bottom board for the seats.
- 7. All seats shall be rigidly fixed to the floor by means of nuts and bolts.
- 8. The cabin floor should be covered with 3mm thick aluminium chequered plate rigidly fixed to the under frame cross members by means of nuts-and bolts or riveting. Trap doors for draining spilled oil or water and for topping up of oil etc shall be provided at proper places.
- 9. A grab bar shall be fixed in the cabin between the crew and the driver portion. It shall be strengthenedby three vertical supports and the support shall be fixed rigidly.
- 10. The driver cum crew cabin shall be provided with four full doors, one for the driver, one for the officer and two doors on the rear of the cabin on either side for the crew, ie, on one side there shall be two doors.
- 11. All the four doors shall be fitted on the super structural members, each hung upon three invisible coach type mild steel stout hinges and fitted with best quality handles.
- 12. All the four doors of the cabin shall be fitted with toughened glass with proper closing and opening mechanism.

- 13. All the fourdoorsshallbehinged, opening outwards, hanging fonvard and shall have catch locks and flush type handles provided outside. Door stoppers shall be provided to restrict the door opening to a maximum of 100° from the closed position.
- 14. Locking arrangement shall be provided for the driver door from outside.
- 15. All other doors shall be lockable from inside. In addition to the doors locks, aluminium tower bolt of 200 mm shall be provided for all the doors from inside.
- 16. Adequate grab rails shall be provided for easy embarking and disembarking. It shall be fixed on strong structural members of the cabin.
- 17. The cabin shall be panelled externally with 1.6 mm aluminium sheet.
- 18. The interiors shall be aesthetically finished so as to give a pleasing appearance with high quality workmanship. All joints as well as vertical and horizontal corners shall be neat and smoothly finished. The inside panel of sides and end walls shall consist of 8.0 mm thick pre laminated board. Joints will be covered with anodized aluminium strip. False ceiling with approved ceiling sheet shall be provided.
- 19. The floor of the cabin shall be panelled with good quality PVC coated 3 mm aluminium sheet.
- 20. The construction of cab shall be such that the roof shall support the weight of two men without any damage. The cabin rooftop should be covered fully by 1.60 mm aluminium chequered plate.
- 21. One roof light (LED Type) shall be provided in the driver cabin.
- 22. The driver shall be provided with two large size rear view mirrors with convex round mirrors for overall rear view of the vehicle from top to bottom and left to right, but shall not obstruct the vision of the driver while driving through curves.
- 23. The rubber beading used for fitting glasses and window frame shall be EPDM rubber
- 24. A fire bell of 250 mm diameter shall be provided on the rear left hand side of the cabin (above crew seat) and suitable arrangements shall be made to enable the crew member to ring the bell from inside the cabin (above crew seat) and suitable arrangements shall be made to enable the crew member to ring the bell from inside the cabin.
- 25. Wire mesh guards shall be provided for front wind screen glass, side wind screen glass, side door glasses (4 numbers), light bar, head lights, fog lights and for rear lights. These wire mesh guards shall be of removable type, fitted with wing nuts.
- 26. Fabrication shall be done in such a way that no rattling sound is produced while running/operating the vehicle, by providing adequate sealing/packing materials. The cabin and locker should be of composite construction with sufficient rigidity, reinforcement and to be kept as light as possible.
- 27. A First aid box shall be provided in the cabin. Drain holes shall be provided preferably at the bottom of the crew cabin.

#### Rear Body

The rear body shall be fabricated in continuation and in line with the cabin. The under frame cross crew members shall be fabricated from ISMC channel of  $100 \times 50 \times 5$  mm size. Runner of  $100 \times 50 \times 5$  mm ISMC shall be provided over the chassis member for the uniform distribution of load over the chassis. Each cross members shall be secured to the chassis frame by 16 mm diameter 'U' clamps with aluminium packing block and self locking unit. Balata packing of thickness 12 mm shall be provided in between the chassis frame and cross members.

#### Superstructure

The superstructural members of the cabin shall be constructed out of 2 mm mild steel  $45 \times 45 \times 20$  mm pressed "TOP HAT" sections. The superstructure shall be strengthened specifically on the members with the lockers doors frames etc are to be fitted and also the other members by providing brackets and gussets of 2 mm mild steel plate securely welded. The details of super structure are as follows.

- 1. Under frame cross members—100 x 50 x 5 mm ISMC
- 2. Floor longitudinal members—100 x 50 x 5 mm ISMC
- 3. Vertical members on even side—45 x 45 x 20 mm
- 4. Skirt member—45 x 45 x 20 mm
- 5. Waist member—45 x 45 x 20 mm
- 6. Top deck longitudinal—45 x 45 x 20 mm

The cabin and lockers shall be of composite construction with sufficient rigidity and reinforcement and shall be kept as light as possible. The structure/frame work shall be of welded constructions and made from 2 mm thick mild steel pressed sections and square tubes. The Angles and channels used shall be of minimum 3 mm thickness. The complete structure material shall be treated for anti corrosion by zinc plating. The plating thickness shall not be less than 20 microns. Two coats of Epoxy paint shall be applied to the completely welded structure. The structure shall be so designed so as to avoid any vibration/rattling/ deformation in the intended usage of the vehicle. The interior panelling shall be done from 1.22 mm thick aluminium sheets and the exterior panelling shall be done from 1.60 mm thick aluminium sheets. All the lockers sides of the vehicle shall be covered with minimum 1.22 mm thick aluminium chequered plates. The entire roof of the vehicle, the floor of the crew cabin and lockers and the exterior panelling on top of the tank shall be of Aluminium chequered plate of 2.5mm thickness.

#### Lockers

Lockers shall be provided for secure stowage of all equipment given in this specification. The height of the lockers from the bottom to the top of the opening shall be not less than 600 mm and the depth also shall be not less than 600 mm. All lockers shall he provided with internal automatic lighting arrangement with the master switch in the Driver cab. All lockers above chassis floor and the rear side of the appliance shall be covered with aluminium rolrer shutters. The roller shutters shall be made from extruded aluminium sections with suitable roller, spring, guide channels, etc. All aluminium sections used shall be properly anodized. The roller shutters shall be rolled inwards underneath the roof giving unobstructed access to the equipment lockers and the fire fighting material. These roller shutters shall open in every position of the vehicle even in rough terrain. Guide rails shall support the shutters over entire length on both sides to make them absolutely torsion free. The roller shutters shall have a sturdy lock, preventing accidental opening during movement of vehicle. Roller shutters shall be made of hollow rectangular shaped aluminium links which shall be inter connected with rubber/plastic/PVC profiles sealing the roller shutter watertight when closed. The complete shutter assembly, the side, bottom and main profiles as well as the locking system shall be from the shutter manufacturer only. These roller shutters shall be durable, maintenance free, weather and corrosion resistant.

Preferable make: FIRESCAPE, SRS, MCD or equivalent models of Ziegler/Rosenbauer

#### Other Works

- 1. Guards shall be provided for propeller shafts.
- 2. Suitable brackets should be provided on top of the tank for the spare wheel.
- 3. Drag Hook or Eye of adequate strength and design will be provided at the rear and front of chassis.
- 4. Spark arrester shall be fitted in the exhaust pipe of the vehicle. If the chassis is Exempted from providing spark arrester, the document in proof of the same shall be submitted.

- 5. A suitable bumper shall be provided at the rear end, rigidly fixed to the super structural members by means of nuts and bolts, fabricated from 100 x 50 x 5 mm ISMC. If Bumper provided by the OEM is available with the chassis, same shall be used in the vehicle after fabrication also.
- 6. Quick removable type wire mesh guard made from 25 mm x 25 mm size mild steel wire mesh of 1.6 mm covered in mild steel angle frame shall be provided to all the glasses of driver-cumcrew cabin.

No modification/connection shall be made in compressed air passage lines of the vehicle for any tapping of air, without obtaining permission in writting from the OEM. For any such requirement the free port of the DD unit of the compressed air system shall be made use of.

#### Stowage of Equipment

For all hose fittings like branch pipes, etc., quick release type couplings shall be provided which enables the operator to locate the desired equipment instantly and thereby save valuable time at the time of fire. These couplings shall also ensure that none of the item damage the internal panelling and thereby increase the life of the vehicle. Suitable clamps, brackets, Straps, holders, etc, shall be provided for all other such items stowed in different lockers.

#### 12. Electrical System

All important electrical circuits shall have separate fuses suitably indicated and shall be grouped into a common fuse box located in an accessible position in Driver's cab and fitted with means for carrying spare fuses. The wiring should be double pole and should not be exposed to the atmosphere. Conduits shall be used wherever necessary. All equipment lockers should have individual lights which will automatically switch ON when the shutter is opened (which will be fully LED based) and these should be operated by means of a master switch on the dash board in the driver's cabin.

The switch for the light/siren should be provided on the dash board.

#### Other Electricals

Two fog lamps in addition to normal head lights shall be installed. Blinker type traffic indicators provided by the OEM shall be maintained in the vehicle after fabrication. Protective wire net shall be provided for all lights and indicators. Reversing lights on either side should be fixed suitably at the rear of the appliance with wire mesh in such a manner to prevent accidental damage by the fireman while mounting the tank top.

A spot light not less than 50 W (LED) power shall be provided

Two-tone hooter cum P.A. System having 25 watt capacity with speaker, LED Light bar with red, blue and white flasher lights of minimum 75-100 watts and not less than 1000 mm size shall be mounted on the cabin roof with amplifier in the cabin.

One pair of additional Megasonic High Tone electric horn shall be provided.

Reverse gear and indicator buzzers shall be provided.

3 Nos. Duel Red-White and 3 Nos. Duel Blue-White Scene-Lighting LED Blinkers with inbuilt flasher should be installed on the upper periphery of the super structure. The Blinkers should have an integrated option of minimum 12 Watt spot lighting with Low, Medium and High brightness control. The base should be of Aluminium and the cover should be Polycarbonate. The light should be compatible to both 12V & 24V. It should be SAE certified from NABL/Accredited Lab.

#### 13. Rear of the Appliance

- (a) Strong grab rails with support at the rear should be provided. Strong Aluminium grab rail support on top of the appliance, on either side, running from behind the cabin roof top to the rear foot board level of the appliance shall also be provided.
- (b) The entire rear portion other than the foot board shall be covered with 2.0 mm aluminium chequered plate and the foot board shall be covered with 2.5 mm aluminium chequered plate.

- (c) A small ladder fabricated out of 1" dia. 2 mm thick M.S. tubular pipe shall be provided and fitted at the rear of the vehicle to climb on the top of the vehicle.
- (d) An adequately illuminated control panel shall be provided near the pump and easily accessible to operator for operating different controls.
  - (e) The control panel of the rear should have following arrangement.
    - 1. Throttle Control for engine.
    - 2. Compound gauge.
    - 3. Pressure gauge (High pressure).
    - 4. Pressure gauge (normal pressure).
    - 5. Primer valve control.
    - 6. Cooling water valve.
    - 7. Tube type level indicator showing level of water in the tank.
    - 8. Suitable panel lights and all other required items.
    - 9. Electronic pump control panel
- (f) The main pump, hose reel system and the pump control panel shall be covered with Rolling Shutter at the rear of the appliances.

#### 14. Rear View Camera

Rear view camera shall be provided for the vehicle with 7 inch LCD screen within the cabin. The camera shall have minimum 120° field of vision with a 1/3 inch image sensor.

GPS system: GPS system shall be enabled in the vehicle

The device should be certified with 1P65, MIL-8 lOG for shock, vibration, drop, dust & humidity.

The device should be supplied along with vehicle charging adaptor and MIL- 810G certified rugged vehicle mounting kit with dashboard bracket.

Test Certificates and Authorisation letter from the Ladder manufacturer shall be submitted with the technical bid.

#### 15. Ladder and Ladder Gallows

A 10.5 m aluminium double extension trussed type ladder shall be supplied along with the fabricated vehicle and ladder gallows shall be provided with rollers for carrying the same.

The ladder shall be able to carry the weight of 3 Persons.

The ladder shall be CE certified as per JCDD/IO Standard or higher.

Preferable make Simplex or Firescape.

The mounting of the ladder shall be such that the ladder shall not extent outside the length of the vehicle when stowed. Arrangements shall be provided for locking the ladder properly, when it is stowed.

#### 16. Workmanship and Finish

Workmanship executed shall be of the highest order. All rivet and boll holes shall have a coat of approved paint on both surfaces before riveting or bolting or welding. All steel screws, bolts, nuts, rivets etc. shall be zinc coated or shall have rust proof coats by a recognized process. All the sharp edges shall be grinded. The roof joints shall be subjected to rigid water test at vendor's workshop in presence of purchaser's representatives. All directions and instructions given at any stage of fabrication

by the purchaser/representative for quality and workmanship oil points related to the fabrication shall be executed. All the material used in the fabrication of the body work shall be of good quality. All equipment and material shall comply with the requirements of the latest relevant IS specifications.

Any other equipments/fabrication are necessary to perform the normal functioning of the water tender if any, which are not mentioned above should be supplied/done by fabricator.

#### 17. Painting

The crew cabin shall he painted cream. Necessary anti corrosion and primer coat in pink colour shall be applied before painting. The body shall be painted fire red in colour conforming to shade No. 536 of IS 5: 2007. The paint shall conform to IS 2932:2003. The whole vehicle shall be painted internally and externally with one coat of zinc chromate and all coat, two finishing coats and clear coat. Phosphating and painting of the chassis shall be carried out to withstand Seasonal climate effects. The words "Kerala Fire & Rescue Services" shall be painted in letters of 10 cm height on one side of the body of vehicle in golden yellow colour paint. Same text in "Malayalam Font" shall he painted over the other side in same manner. The name of the department "Kerala Fire & Rescue Services" in form of sticker in fluorescent red letter in yellow background shall he affixed oil top of the front wind screen glass. Emblem of the department shall be affixed on either side of the cabin front Door (Model shall be provided by the department) 'Dial 101' shall he written on all the four sides of the vehicle on yellow background in black letters.

#### 18. Marking

Each appliances shall be clearly and permanently marked oil side of the body with the following information.

- (a) Manufacturers Name
- (b) Serial Number of the pump, body and year of construction.
- (c) Capacity of pump.
- (d) Capacity of water Tank.
- (e) Working pressure of pump.

#### 19. Accessories

The following accessories shall be supplied along with each vehicle.

Sl. No.	Particulars of Accessories	Qty.
(1)	(2)	(3)
1	Suction hoses 140 mm of 2.5 meter length, made of Heavy duty plastic DUTRON or equivalent, coupled with round threaded gunmetal couplings. Each hose to be kept just above the water tank in special brackets. (Gun metal/Brass)	4 Nos.
2	Suction Metal Strainer 140 mm( Gun metal Brass)	l No.
3	Basket Strainer	1 No.
4	Suction Wrenches (universal type)	l pair
5	Delivery Hose	15 Nos.
	It shall be non-percolating and synthetic type B. Minimum length shall be 15m.  Shall be provided with instantaneous male and female couplings of size 2½" (Gun metal/Brass)  Size of the hose should be 2½"  Delivery Hose should comply with latest IS-636.	

(1)	(2)	(3)
6	Standard Brach pipe with 19mm Nozzle (Gun metal)	1 Nos.
7	Foam Making Brach FB 2 with Pick up tube Discharge Not less than 900 LPM Induction adjustable	1 No.
8	Portable fire extinguisher, ABC Type, 6 kgs capacity, ISI marked	2 Nos.
9	Portable fire extinguisher, CO2 type, 4.5kgs capacity BIS marked	2 Nos.
10	Shears/Bolt cutter-28" Preferable make Everest/Jhalany/Taparia	l No.
11	Shears/Bolt cutter-36" Preferable make Everest/Jhalany/Taparia	l No.
12	Fireman's Axe (Insulated and tested for 30,000 V)	l No.
13	Sledge hammers of 2.5 kg	l No.
14	Sledge hammers of 5 kgs	l No.
15	Nail hammer (Fibre handle with rubber grip, Length not less than 12 inch and weight not less than 1.5 Kg)	1 No.
16	Crowbar 20 mm dia of 1.5 meter	l No.
17	Crowbar 25 mm dia of 2.0 meter	l No.
18	3 way Suction Collecting head (140 mm) (Gun metal/Brass)	l No.
19	Dividing breeching with control valve (63 mm) (Gun metal/Brass)	1 No.
20	Collecting breeching instantaneous (63mm) (Gun metal/Brass)	l No.
21	Fog nozzle with extension applicator with fog head (see IS-952)	l No.
22	Branch with revolving head (see IS 906) (Gun Metal)	l No.
23	Nozzles of size 12mm, 16mm, 20mm & 32mm (See IS 903)	1 each
24	Adaptor double female instantaneous pattern 63 mm (Gun metal/Brass)	l No.
25	Adaptor double male instantaneous pattern 63 mm (Gun metal/Brass)	l No.
26	Nozzle spanner (see IS 903)	l No.
27	Nylon rope-50 mm-40 metre long having two ends spliced in and one end with a running noose	1 No.
28	Poly Propylene rope-50 mm-50 m long Rope shall be provided with a loop on on end and a good quality steel alloy Carabiner (EN362/2004) on the other end for anchoring purpose	1 No.
29	Kern mantle rope 14 mm dia, length 50m, Sewn thimbled eye at one end, Sewn end-stop termination at other end	1 Nos
30	Hydraulic Jack with lock nut Lifting Capacity-300000 KG(30 Ton) with locking facility Hydraulic Lift: not less than 110 mm Weight: not more than 25 Kg (The jacks shall be covered by a guarantee for one year for manufacturing defects and one year for material defects.	1 No.

(1)	(2)	(3)
31	Firehook (see IS 927)	1 No.
32	Fire rake-Length not less than 2m. Head shall not be 1 feet wide. Teeth shall be 10 cm long. 7 teeth at an interval of 2 inches shall be provided.	l No.
33	Axe-large (weight Not Irss than 3 Kg)	l No.
34	Hose handags, Hose Slings, Hose Straps	10 No. each
35	Rubber glove (IS:4770) in pair	6 Nos.
36	Asbestos Gauntlets in pair	6 Nos.
37	Portable Pump	1 No.
	Technical Specification	

- 1. The Pump shall be capable of being used for pumping water from water source and dc-watering purposes.
- 2. It shall be self-containing engine driven unit.
- 3. Weight not more than 30 Kg.
- 4. Engine should be 4 stroke Petrol Engine
- 5. Engine Power: Not less than 3.5 HP
- 6. The engine shall be air-cooled
- 7. The portable pump, shall have 3 inch dia suction inlet and 63 mm (2.5 inch) dia outlet.
- 8. Head of the pump shall not be less than 25 Meters.
- 9. Maximum discharge of the pump shall not be less than 900 Litters/min.
- 10. The priming system should be self-priming.
- 11. Preferable make: Honda.

#### Accessories

Each set of portable pump shall be supplied with the following items.

- 1. 3 inch Suction hose (PVC)-07 Meter
- 2. Suitable delivery hose connector to connect 63 mm instantaneous delivery hose, of the outlet is not 63mm instantaneous type
- 3. Metal Strainer-1 No.
- 4. Basket Strainer- 1 No.

Tool Kit- 1 set, comprising of all essential tools required for the maintenance of the pump.

A guarantee of 24 months shall be provided from the date of final acceptance.

(1)	(2)	(3)
38	Traffic Cones	4
	<ul> <li>Made of PVC flexible material, RED colour, with Black square heavy rubber base.</li> </ul>	
	• It should be single piece moulded cones.	
	• Height not less than 750 mm.	
	• Size of Base not less than 350mm x 350 mm.	
	• Total weight of the cone should be not less than 3.5 kg.	
	• Each Safety Cones should have minimum 4" retro reflective PVC sleeve for low light and night visibility on the top and near the bottom.	
	• The words "FIRE & RESCUE" shall be stickered for easy identification even during night (Retro reflective).	
39	LED Rechargeable Torch	1
	Light Source- LED	
	Power-Minimum 3.7 Watts	
	Battery Type-Lithium-ion	
	Operating Time-not less than 4 hours continuous	
	Battery Capacity-not less than 6000 mAh	
	Body-Aluminium Alloy	
	Charging Time-Not more than 3 hours with supplied	
	charging system	
	Range-not less than 1900m	
	Brand- Britelite or Mr.Light	
40	Rope net	l
	(For Jumping Rescue)	
	Net Size: 5m x 5m	
	Rope material: Nylon	
	Net rope size : 20mm	
	Net mesh size: 75mm x 75mm	
	Border Rope Size: 55mm  Strong 75mm dia metallia ring mada of alterninium aller/steel	
	Strong 75mm dia metallic ring made of aluminium alloy/steel alloy shall be Provided in all the 4 corners and in the centre	
	of all the 4 sides connected to the border rope, so as to enable	
	safe lifting of person/Animal or materials using the rope net.	

(1)	(2)	(3)
41	Well Rescue net-Circular type net Rope material: Nylon	1
	Net rope size: 20mm	
	Net mesh size: 50mm x 50mm	
	Border Rope Size : 55mm	
	Galvanized iron ring of 1 meter dia shall be provided	
	on the top and 0.7 meter dia on the bottom of the basket. Height of the basket shall be minimum 1 meter.	
	4 numbers of strong 75mm dia metallic ring made of	
	aluminium alloy/steel lloy shall be provided connected to	
	the upper GI ring of the rope net to enable safe lifting of	
	person/Animal or materials using the rope net. 4 polypropylene lifting ropes each with 55mm dia and	
	40 meter length shall be provided with each well rescue net.	
	Each Rope shall be provided with a loop on one end and a	
	good quality steel alloy Carabiner (EN362/2004) on the other end.	
42	Tool kit	1 No.
	Double End spanner set 6mm to 36 mm Ring spanner set 6 mm to 36 mm Box spanner set 6 mm to 36 mm with Ratchet, T- bar and Extension Rods etc. Allen Key Set, Insulated plier 8", Screw Driver with insulated handle 8", flat/Square tip of different sizes (Flower bit), VICE GRIP PLIER: Size-10" length (Should have teeth on both jaws Made of forged steel), Cold Chisel, Adjustable Wrench 12" & 24". Etc. Shall be quality products and arranged in a Metal Carry box properly.	
43	Multi Purpose Nozzle	l Nos
	Dual Jet and fog pattern nozzle with pistol Grip, Shut-Off Bale Handle and Spinning teeth with retaining ring.	
	Material of construction: Light weight material such as Aluminium Alloy, Pyrolite etc.	
	The device shall be so designed to minimise the jet reaction.	
	Weight: Not more than 3.5 kg.	
	Max Flow: Not less than 750 lpm @ 7-8 bar.	
	It should provide multiple flow settings as 250, 450, 550 and 750Lpm at 5,6,7 or 8 Bar or better flow rate.	
	Size of water inlet should be 63mm.	
	Should meet relevant NFPA standard (Document shall be produced).	
	Should have 5 year manufacturer standard warranty.	
	Preferable Make-AKRON/ POK/FIRE FLY/FIREBUG.	
44	Metal stopper (Wheel Choke)	2 Nos

#### 20. Inspection & Acceptance Tests

The following stage inspection and acceptance test shall be given to the complete satisfaction of the purchaser. All the testing parameters should be carried out at the manufacturer's premises and the details (photographic evidence) of the testing infrastructure shall be provided. Vendor shall ensure that design of tender will not affect chassis parameters such as speed, turning circle, acceleration etc.

First Stage

Structural work and Measurements, Structural framework, panelling not started. Materials for panelling ready for measuring.

Second Stage

Panelling work, Tank ready not mounted (for hydraulic pressure testing), Pump ready not mounted (for hydraulic pressure testing), platform of water tank, pump and PTO ready for mounting. All the piping shall be subjected to hydraulic test pressure of 15 Kg/cm² for a period of min. 10 minutes. The high pressure suction of the pump assembly shall be hydraulically tested at 52.5 bar during the time of pump manufacturing and a certificate to that effect shall be produced to the department. The entire pump assembly with all its fittings and priming system shall be hydraulically tested at 21 bar (All the above tests shall be carried out at pump manufacturer's/Fabricator's facility) Tank shall be hydro tested at a minimum pressure of 0.3 bar for a period of one hour before mounting on the vehicle.

## Final Stage

Stability

Stability of appliance will be such that when fully equipped & laden, if the surface on which the appliance stands is tilted to either side at an angle of 30° from horizontal it will not overturn.

Gradient

The vehicle will be tested on a gradient test ramp at an angle of 1:4 as, per BIS.

Endurance Test

The pump will be tested for a continuous period of three hours nonstop delivering the rated output at 7 Kg/cm² & for one hour at 35kg/cm² with a lift of 3 m. During the test, water will not be replenished for the cooling system & the engine will not show signs of overheating. The testing charges for the same shall be borne by the vendor.

#### Priming/Deep Lifting Test

The priming shall be tested as per the latest standards & the system shall be subjected to a test at a suction of 7 Mtrs. The priming should be achieved in less than 36 seconds.

## **Articulation Test**

The vehicles shall be tested for articulation and shall not show any signs of stress during this test. The clearance in the wheel wells shall be checked for tolerances.

#### Road Test

After completion of all the above mentioned tests, a road test shall be carried out where the vehicle shall be tested for its performance as per BIS. The braking, acceleration & top speed tests shall be checked & recorded by the inspecting officers.

## **Shower Test**

Water proofing test shall be carried out as per IS 11 865 to ensure that ther is no leakage, seepage or wetness.

#### **Equipment & Accessories**

All the equipment and accessories mentioned in the specification shall be ready for verification during the Final Stage inspection of the vehicle.

#### 21. Specifications and Drawings

Considering the detailed Specifications, the drawings (Hard copy as well as Soft Copy in pdf shall be included) should be submitted to the KF&RS Department by the Vendor. The Director General, Kerala Fire & Rescue Services or his representatives may suggest modifications to the drawings. However, modified drawing should be submitted by the Vendor within 3 days from the suggestion/discussion. The Bidder shall start the work only after getting the drawings approved by the Director General Kerala Fire & Rescue Services; The drawings should clearly illustrate the detail. Two sets of complete and final Drawings (both the Hard copy as well as Soft Copy shall be included), in respect of fabrication, stowage arrangements, fittings, electric circuit arrangement etc. shall be supplied at the time of delivery of the appliance. The quote shall be inclusive of the cost for such drawings.

#### 22.Instruction Book

A detailed instruction book in English for the guidance of the user shall be prepared and supplied. It shall contain the details of operation, maintenance and proper use of the vehicle, all the appliances and equipment.

#### 23. Acceptance

The fully fabricated vehicle with all equipment and accessories shall be delivered at Fire & Rescue Services Headquarters, Thiruvananthapuram, Free on road. The delivered vehicle shall be inspected by a board of officers for the general functioning of the vehicle, associated equipment and accessories. The vehicle shall be accepted by the department based on this report.

#### **Conditions**

	1. Essential documents to be submitted along with the tender	_	Pamphlets, Photograph, Drawings, CD etc.
	2. Period of delivery	_	Within 90 days from the date of acceptance of chassis.
	3. F. O. R.	_	Thiruvananthapuram.
4	4. Payment	_	100% Payment against delivery of Fire Tender at Thiruvananthapuram and acceptance by an acceptance committee.
	5. Warranty	_	A Warranty of 36 months for the fabrication and for the accessories as per specification from the date of final acceptance.
	6. Other Special Conditions		1. EMD-1% of PAC in online payment.

2. Security Deposit 5% of total contract amount to be furnished as mentioned in the Notice inviting e-Tender, which will be released after the expiry of the warantee period.

- 3. Any firm whose proprietor, Partner or Director is involved in a Vigilance Case has been charge sheeted and pending trial at court in connection with fabrication/supply of similar product made earlier to this Department/Kerala Government are not eligible to participate and shall be barred from participating in this tender.
- 4. The tenderers should produce latest solvency certificate of Rs. ₹ 3 crores or more and should have an average annual turnover of ₹ 2 Crores for the last 3 years.
- Anybody attempting to offer bribe or otherwise influence in any manner the officials of the Kerala Fire and Rescue Services or its supervisory levels in the Government will be disqualified.
- 6. The bidder should have sufficient previous experience (Minimum 3 years) in fabricating Fire Fighting Vehicles (at least 15 Fire Fighting Vehicles should have been fabricated by the bidder during last three years). The copies of supply order for fabricating Fire Fighting Vehicles placed by states, Union Territories, and Public Sector Undertakings for previous years should be produced in support.
- 7. On receipt of the chassis, the tenderer should provide Insurance cover for the Kerala Govt. property for an amount equal to the cost of total number of chassis for fire, damages due to other natural or manmade calamities and theft.
- 8. Renewal of temporary registration processes shall be performed by the fabricator at their own expense. A valid Temporary Registration Certificate (T.P) shall be produced before the department at the time of delivery.
- 9. The Load distribution chart and detailed drawing of the Water Tender shall be submitted and got approved from the department by the fabricator, before commencing the fabrication.

- 10. If the supplier is not in a position to repair the equipment or accessories provided in the vehicle, they shall arrange for total replacement of that particular item. as the case may be up to a period of 3 years from the date of acceptance of the vehicle by the department at Thiruvananthapuram.
- 11. The vendor shall be responsible for the maintenance of the Fire Tender for any defects or damages to vehicle due to bad and workmanship or of any inferior material, accessories, apparatuses etc.
- 12. The vendor should provide service assistance and supply of spare parts for a period of minimum 5 years after the expiry of warranty period, within 30 days since any complaint is reported to the vendor.
- 13. The chassis shall be collected by the vendor from the chassis supplier location. Final Registration of the vehicle will be arranged by KFRS after the completed vehicle is delivered to the KFRS. The vendor shall take temporary registration of completed vehicle & submit all relevant documents to the KFRS for final registration.
- 14. Any damage/short fall shall be made corrected by the vendor at no extra cost to KFRS. After receiving chassis from the KFRS, and during the period of fabrication of Fire Tender, vendor shall arrange to carry out all periodic services as recommended by the chassis Manufacturer at its fabrication site.
- 15. After accepting the chassis by the fabricator and till such time the completed vehicle is delivered to the KFRS, it shall be the vendor's responsibility to protect the chassis from damage, accident, pilferage etc.
- 16. Any modification like Welding, drilling etc. on framework of chassis should be done as per the guidelines given by the chassis manufacturer. The vendor should submit load distribution chart on axles before starting the fabrication. All axels should be loaded within the maximum permissible pay load specified by the chassis manufacturer.

- 16. Any modification like Welding, drilling etc. on framework of chassis should be done as per the guidelines given by the chassis manufacturer. The vendor should submit load distribution chart on axles before starting the fabrication. All axels should be loaded within the maximum permissible pay load specified by the chassis manufacturer.
- 17. Any restriction on performance chassis, observed during/after execution of order shall have to be rectified by vendor in consultation with KFRS and chassis manufacturer. Such corrections shall be at no extra cost to KFRS. The vendor shall be responsible for supplying all equipment/accessories and properly fixing them on the chassis as described in the specification. Other details and requirements which are not covered under the specification, but may be necessary to complete the Fire Tender and/ or to fulfil the operation/performance requirement shall be provided by the vendor, who shall be responsible for the designing, engineering and construction of the complete appliance to the full satisfaction of the KFRS. Before finalising of design, the same needs to be approved by KFRS.
- 18. At the end of complete fabrication of Fire Tender, the vehicle with fully laden conditions shall be checked and certified by vendor for correct load distribution on individual axle. The actual individual load on axle shall not exceed the allowable limit specified by chassis manufacturer or regulating authority, whichever is lower. Chassis supplier shall be called at the vendor's site to verify the correct load distribution & fabrication of vehicle as per guideline of chassis supplier.

Office of the Director General, Fire and Rescue Services Headquarters, Thiruvananthapuram.

Sandhya, B., IPS, Director General.
